ZIMNRG PLC
ACCOUNTING POLICIES
YEAR ENDED 28 FEBRUARY 2010

Basis of accounting

The financial statements have been prepared under the historical cost convention, modified to include the revaluation of financial instruments and in accordance with applicable accounting standards.

Investment properties

Fixed asset investments are initially recorded at cost. Investments are reviewed annually for impairment and if any permanent diminution in value is recognised, then are written down to net realisable value.

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more tax, with the following exceptions:

Provision is made for tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and charged to tax only where the replacement assets are sold.

Deferred tax assets are recognised only to the extent that the Directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

Foreign currencies

Transactions in foreign currencies are translated at the exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the balance sheet date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured at historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items and on the retranslation of monetary items are taken to the profit and loss account. Exchange differences arising on non-monetary items, carried at fair value, are included in the profit and loss account, except for the differences arising on the retranslation of non-monetary items in respect of which gains and losses are recorded in equity. For such non-monetary items, any exchange component of that gain or loss is also recognised directly in equity.

ZIMNRG PLC**ACCOUNTING POLICIES** *(continued)***YEAR ENDED 28 FEBRUARY 2010****Financial instruments**

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.

Investments

All investments are initially recorded at cost, being the fair value of the consideration given and including acquisition costs associated with the investment. All purchases and sales of investments are recognised using trade date accounting.

After initial recognition, investments, which are classified as held for trading and available-for-sale, are measured at fair value. Gains or losses on investments held for trading are recognised in the profit and loss account. Gains or losses on available-for-sale investments are recognised as a separate component of equity until the investment is disposed of or until its value is impaired, at which time the cumulative gain or loss previously reported in equity is included in the profit and loss account.

Investments are fair valued using quoted market prices, independent appraisals, discounted cash flow analysis or other appropriate valuation models at the balance sheet date.

Cash and cash equivalents

Cash and cash equivalents are included in the balance sheet at cost. Cash and cash equivalents comprise cash at bank and in hand and short term deposits with an original maturity of three months or less.
